Development of Mobile Applications

Mobile Applications

Market needs drive the introduction of technological innovations, which is one of the reasons why companies are looking forward to offer mobile device applications. HexaSystems is growing as a mobile applications provider, developing solutions that integrate information systems allowing you to target devices like [iPhone](#), [iPad](#), [Android](#), [Blackberry](#) and [Windows Mobile](#).

Our mobile solutions seek to exploit the benefits of current technologies such as Multi-Touch interface, location services, WiFi and Bluetooth. As a result we deliver innovative applications that combine art with a high level of engineering.

iOS

 Windows phone

 BlackBerry™

Project Design and Web Development

Project Design and Web Development

Develop corporate portals tailored to customer requirements. We offer advice to project their corporate image through all systems: E-Commerce, Enterprise Portals, Intranets and Extranets Content Management Tools (CMS) as well, all based on technologies such as Microsoft .net, php, Joomla and Wordpress.

We focus our services to corporate, commercial and public institutions providing solutions with high quality standards and following the latest trends, also offering, social networking, search engine optimization, marketing and SEM.
